*Life-span Development* John W. Santrock, 2011 Connect with Life-span Development and connect with success Informed and driven by research. At McGraw-Hill, we have spent thousands of hours with you and your students, working to understand the key needs and concerns you face in Human Development courses. The most common topics raised include managing the vast amount of content inherent to a Lifespan course and ensuring the dependability of the assigned material—is it current and accurate? The result of this research is John Santrock's Life-Span Development. Life-Span Development ensures students complete and understand the assigned material in a number of ways. Santrock's hallmark Learning Goals pedagogy provides a comprehensive roadmap to the text material, clearly pointing out the core concepts fundamental to students' learning and performance. An adaptive diagnostic tool increases students' efficiency in studying by identifying what they know and don't know and providing in-the-moment guides to learning what they do not. At the same time, instructors have access to powerful visual reports allowing them to quickly see where students' strengths and weaknesses lie. Connect Lifespan takes your instruction and your students' learning experience to the next level without requiring hours of setup and personalized instruction by you. The research and development of the 13th edition indicated that students said that highlighting connections among the different aspects of life-span development would help them to better understand the concepts. This recurring theme of connections—Developmental Connections, Topical Connections, Connecting Development to Life, Connecting with Careers, and Connections through Research—ties together concepts from across chapters to reinforce the learning process and connects the material to students' everyday lives and future aspirations. And our new Milestones of development help bring the course material to life, allowing students to witness development as it unfolds. Connecting to today's student, connecting research to what we know about development; connecting developmental processes; and connecting lifespan development to the real world are the 4 key ways that the connections theme has shaped this 13th edition. All of this material is informed by Life-Span Development's unique board of expert contributors—a who's who of developmental psychology—ensuring that the material is as accurate and up-to-date as possible.

**Life-span Development** Leonie Sugarman,2004-03-01 This thorough revision of the highly successful first edition of Life-Span Development offers the reader a wide-ranging and thought provoking account of human development throughout the lifespan. The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age. In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied, including reviews of the work of key theorists Erikson, Levinson and Gould. She goes on to consider the different ways in which the life course can be construed: as a series of age-related stages; as a cumulative sequence; as a series of developmental tasks; as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity. A final chapter looks at how people cope, the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process. New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development. This edition is also more student-friendly with exercises in self-reflection that encourage the reader to look at the development of their own lives or those of their current or future clients. Boxed material highlighting major theories and clarifying concepts is also included. This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management, education and social work.

*Life-Span Development and Behavior* Paul B. Baltes,David L. Featherman,Richard M. Lerner,2014-02-04 This serial publication continues to review life-span research and theory in the behavioral and social sciences, particularly work done by psychologists and sociologists conducting programmatic research on current problems and refining theoretical positions. Each volume introduces excellent peer-reviewed empirical research into the field of life-span development while presenting interdisciplinary viewpoints on the topic. Often challenging accepted theories, this series is of great interest to developmental, personality, and social psychologists.

**Family Systems and Life-span Development** Kurt Kreppner,Richard M. Lerner,2013-05-13 This interdisciplinary volume presents international research and theories focusing on the development of the individual across the life span. Centering on family as the key context influencing, and being influenced by the developing person, the contributors to this volume discuss an array of theoretical models, methodological strategies, and substantive foci linking the study of individual development, the family system, and the broader context of human development. The volume presents continuing empirical research and theories in the realm of individual and family development and features a developmental, contextual view from a process-oriented vantage point.

The Handbook of Life-Span Development, Volume 1: Cognition, Biology, and Methods presents the study of human development conducted by the best scholars in the 21st century. *The Human Odyssey* Paul S. Kaplan,1992 Integrating developmental principles into a lifespan perspective, this chronologically organized text presents theory, up-to-date research, issues, and applications. It covers all aspects of human development. This text encourages students to develop critical thinking skills through features examining issues such as day care, health care, and surrogate parenting.

*Life-Span Development and Behavior* David L. Featherman,Richard M. Lerner,Marion Perlmutter,2014-01-14 This volume continues the tradition of the Life-Span Development Series, presenting overviews of research programs on a variety of developmental topics. Research and theory in life-span development have given increased attention to the issues of constancy and change in human development and to the opportunities for, and constraints on, plasticity in structure and function across life. Acknowledging the need for and existence of interconnection between age and developmental periods, it focuses on conditions for possibly discontinuous development that emerge at later periods. Contributors to this series are sensitive to the restrictive consequences of studying only specific age periods, such as old age, infancy, or adolescence. Each scholar attempts to relate the facts about one age group to similar facts about other age groups, and to move toward the study of

transformation of characteristics and processes over the life span.

*Life-Span Developmental Psychology* Paul B. Baltes, K Warner Schaie, 2013-09-11 *Life-Span Developmental Psychology: Personality and Socialization* presents papers on personality and socialization. The book discusses the history, theory, and psychological approaches of developmental psychology, with focus on socialization and personality development through the life span; personality dimensions; and theories of socialization and sex-role development. The text also describes the life-span perspective of creativity and cognitive styles; continuities in childhood and adult moral development revisited; and issues of intergenerational relations as they affect both individual socialization and continuity of culture. The interactional analysis of family attachments; social-learning theory as a framework for the study of adult personality development; person-perception research; and the perception of life-span development are also considered. The book further tackles the potential usefulness of the life-span developmental perspective in education; the strategies for enhancing human development over the life span through educational intervention; and some ecological implications for the organization of human intervention throughout the life span. Developmental psychologists, sociologists, gerontologists, and people involved in the study of child development will find the book invaluable.

Life-span Developmental Psychology E. Mark Cummings, Anita L. Greene, Katherine H. Karraker, 2014-01-02 Although there has been a significant increase in studies of stress and coping processes in recent years, researchers have often approached these topics from rather narrow and constrained perspectives. Furthermore, little communication has occurred across disciplines and research directions, resulting in the emergence of several relatively isolated literatures. An outgrowth of the Eleventh Biennial West Virginia University Conference on Life-Span Development, this volume emphasizes two major themes: the importance of taking a life-span approach to the study of stress and coping, and the development of new and more complete conceptual models of stress and coping processes. The first to approach these subjects from a life-span perspective, this book includes papers by distinguished researchers from each of the major periods of the life-span, and brings together the cognitive and socioemotional traditions in the study of dealing with pressures. The editors hope that this facilitation of communication among researchers with diverse views will help create a broadening and integration of perspectives.

**Life-Span Development and Behavior** David L. Featherman, Richard M. Lerner, Marion Perlmutter, 2019-05-24 The final volume in this significant series, this publication mirrors the broad scientific attention given to ideas and issues associated with the life-span perspective: constancy and change in human development; opportunities for and constraints on plasticity in structure and function across life; the potential for intervention across the entire life course (and thus for the creation of an applied developmental science); individual differences (diversity) in life paths, in contexts (or the ecology) of

human development, and in changing relations between people and contexts; interconnections and discontinuities across age levels and developmental periods; and the importance of integrating biological, psychological, social, cultural, and historical levels of organization in order to understand human development.
